Professor Joshua Lederberg
Rockefeller University
1230 York Avenue, Suite 400
New York, New York 10021

Dear Professor Lederberg:

In a recent conversation with André Marion, Chief Executive Officer and President of Applied Biosystems, Inc., he mentioned that you had expressed interest in some of our products and/or projects under investigations. Additionally, he indicated that you have started an endeavor outside the University and that there might be areas of common interest between our companies.

My responsibility within ABI is to initiate such contacts, evaluate technologies if appropriate, and to arrange meetings between appropriate internal employees and external groups. Given this, I would like to indicate my availability to act in this capacity and can be reached at the above telephone and fax numbers.

I hope to hear from you soon.

Sincerely,

K. Wilson

Ken J. Wilson, Ph.D.
Vice President
Science and Technology

KJW/jps

disk

There is some confusion.

① I had expressed strong interest in capillary electrophoresis / ssDNA polymerases for my university research project.

② I am also affiliated with Affymax - with whom you are also in contact. No connection between ① and ②!

*Sincerely,
John E. Eubank*
